 - II. Claims 38-40, drawn to a specific method for determining a threshold, classified in class 370, subclass 252.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as it could be utilized for determining a threshold in an environment that is different than those in invention I and invention I does not require the use of invention II together.
